

Build Great Fishing Rods

2019 New Products Supplement

2019 New Products Supplement

Come build great fishing rods with us!

Pacific Bay International is proud to be one of the oldest fishing rod components manufacturer in the industry. In the late seventies manufactures needed an economical reliable source for their rod components. It was then that a component company was formed and a mission was started to supply fishing rod manufacturers with quality product. Pacific Bay needed a proper distribution center and our first headquarters based in California gave a growing fishing rod industry a reliable domestic one-stop shop for guides and tip-tops. It wasn't long before the product catalog grew to include reel seats and other hardware. In 1998 Pacific Bay relocated the US headquarters and distribution warehouse to Sequim, WA. Pacific Bay International continues to be the largest warehouse and distribution warehouse of components located in the United States. We proudly distribute our product in 5 different continents and are well represented in over 20 countries. Practical, economical, and proven in every fishery throughout the world. Today Pac Bay is proud to produce over

14,000 products and has the ability to provide private label and custom solutions for all things rod building.

In an industry of ever-changing innovation and design, Pacific Bay has been lucky to have some of the strongest talents when it comes to product development. Whether you're a leading manufacturer or just getting your feet wet as a custom rod builder in your garage you can rest assured that our components are readily available. With a service first model that aims at providing the best rod components and blanks in the market, you will know you're delivering the best product.

Dealers, Distributors, and Fine Fishing Rod Builders

Pac Bay would like to thank all of our customers, many of them have been with us for over three decades. They know the product well and have consistently stocked our product to fulfill builder's needs. We provide the rod builders with a complete listing of our dealers on our website www.fishpacbay.com in the 'where to buy' section. If you are a rod building company and would like to open an account you can reach us at info@fishpacbay.com.

Arctos

The Arctos Series is Pac Bay's latest release in our ever-growing blank line up. "Ursus Arctos", which translates into "Brown Bear" was the theme of this series. There is no doubt that this series performs like a fish eating machine! Designed using a combination of conventional rod design coupled with modern engineering technology, we crafted Arctos using some of the best Toray Graphite Material available. The end result was an incredibly light mid-high modulus blank with great actions for every fishery. If you're going to be a bear, you might as well be a grizzly.

- Satin Metallic Brown Finish
- Multi-Modular Graphite Strands for outstanding power
- Proprietary prepreg fiber to construct a blank that is lighter and stronger than competing brands
- Stronger / Smaller Butt OD for easier rear handle assembly
- Moderate - Fast actions
- Newest desired lengths in 3" and 9" inch increments
- Limited Lifetime Warranty*

Tradition II Musky / Heavy Application

These new Tradition II musky / heavy application blanks are very light for a mid-modulus blank. They are also proven strong. We've put these blanks up against some of the toughest musky, pike, rockfish, halibut, and numerous other big fish species. The results were an unbelievably lightweight blank that could stop a freight train. When you need a blank that will endure the rigors of the toughest fishing conditions you will want to pick up a Tradition II.

- Natural Matte Gray Finish
- Great economical value gives assemblers and builders an advantage over the competition
- Enhanced IM6 Graphite enhances sensitivity from tip to butt
- New two piece models to reduce increased shipping rates and make travel easy
- Limited Lifetime Warranty*

Arctos Fly

Given the success of our new Arctos series that we launched in 2018 we have decided to offer the series in natural graphite. This provides OEM, Assemblers, and custom builders more options when picking out cosmetics for their builds.

Titanium Guides

- 30%-40% lighter than stainless steel frames
- Ultimate corrosion resistance in saltwater
- Strong, but with enough flex to handle tough conditions
- Now offered in all of our most popular guide models
